

Jim Schlarb carved this covid croc using a regular chainsaw, a chainsaw gouge, and a 4-1/2" grinder with a very course disk for some touch up. It was a large red oak log, close to 30" in diameter. The croc is 17' long. It must weigh over 1500 lbs, the log is still quite wet. Jim worked on it off and on for a couple of months. It's on a hill overlooking his driveway greeting visitors. The newest addition to Jim's spectacular sculptures.
